Subject: RE: NYS Rad Site Data-Weston
Importance: High

Thanks. My management already asked if there is any way to obtain the soil analytical earlier than September 14th? Can we get a quicker turnaround time with increased fees?

Eric,

As requested, please find attached the analytical deliverables schedule for the NYS Rad sites.

Thanks,

Subject: NYS Rad Site Data-Weston

Good Morning:

Can we get a chart for when soil and radon results were received or due to be received?

Also, as far as priorities, we need to see all the survey data in spreadsheet form (along with sample results) as well as that data incorporated into maps similar to the SAT Weston reports for Pre-Remedial. If we can get a draft for each site with data obtained already (HPIC, Rad7, Ludlum 2241, Fluke PIC and SAM 940) ASAP, that would be great. We will need a contamination footprint for each site, the area of the footprint. Meaning, we will need to estimate the area of concern.

We need that information to create our action memos, estimate disposal (area plus depth to calculate amount) and discuss with the technical team.

We will take the info you provide us and give draft reports to the property owners/operators.

The final report and all the work that goes into that is secondary.

I am off today and will be at CRU tomorrow at 9am.

Thanks
